

The Exclusive line is a complete care program for mature skin or skin in need of intensive care. Our products are formulated using carefully selected active ingredients with proven effectiveness.

As not every skin corresponds exactly to one specific skin type, we recommend combining products from our six different care lines as needed. Your esthetician can advise you as to which combination of products best suits your individual skin.

Aloe Vera After Sun Milk

Cooling, moisturizing body lotion after sun exposure. Reduces tension and protects from dryness.

Bronze Power

Self-tanning lotion that provides a natural, streak-free glow until it will be renewed by invisible scaling.

EXCLUSIVE MATURE SKIN OR SKIN IN NEED OF INTENSIVE CARE

Dr. Spiller
BIOCOSMETIC

Mature skin or skin in need of intensive care is often dry because, with increasing age, the cell functions as well as the skin's moisture-binding capacity decrease. This leads to reduced resilience and elasticity. Also, the lack of moisture lines deepens the appearance of fine lines and wrinkles. Select active ingredients stimulate the cell function, tighten the epidermis and increase moisture.

Highly active care with rejuvenating properties for a radiant complexion

Jojoba Peeling Cream
Gentle exfoliator refines the skin texture with fine jojoba wax grains. Dead skin cells are gently removed, blood circulation is stimulated and excess surface oil is removed. Supports and improves the effect of products that follow.

Cleansing Cream with Royal Jelly
Mild cleansing emulsion loosens dirt particles and make-up while protecting the skin's pH value. The skin appears fresh and dewy.

Hydro-Marin® Cleansing Foam
Mild cleansing foam with algae extract and marine trace elements to restore minerals to the skin. For an intensive yet mild cleansing. pH neutral.

Hydro-Marin® Freshener
Refreshing toner with algae extract and panthenol. Supports the skin's naturally acidic protective layer and stabilizes the pH value.

Bio Cellular Hydro Gel
Revitalizing gel with aosa algae extract and ATP. Balances moisture loss and improves the regeneration of the skin. To be used before day-/night cream.

Celltresor Gel
Collagen peptide-based moisturizer with a combination of select active ingredients to improve the appearance of aging skin. Supplies energy to the cells, stimulates collagen production and increases the moisture content in the skin. For optimum results, use in combination with Celltresor Cream or before day-/night cream.

Silk Serum
Concentrated preparation with silk proteins, shisandra and beta-glucan for a radiant complexion. Tired skin is visibly revitalized and refined. To be used as a moisturizer before day-/night cream.

Bio Cellular Day Cream
Balancing, moisturizing cream with precious natural ingredients and lipids. Refines the skin's texture and increases elasticity for a fresh appearance.

Bio Cellular Night Cream
Rich night cream stimulates the cell regeneration and metabolism. For more vitality and resilience.

Celltresor Cream
Hightech care complex with a combination of select active ingredients to improve the appearance of the skin. Complexion, texture and fine lines and wrinkles are visibly improved. Skin care for the highest expectations.

Silk Complex
24-hour luxury care with silk proteins, bamboo extracts and vitamins A and E for more resilient and visibly smoother skin. Cat's claw extract strengthens the skin's immunity.

Bio Cellular Cream Mask
Moisturizing cream mask for increased elasticity and resilience. Prevents premature fine lines and counteracts the aging process of the skin. To be used once or twice weekly for optimum effects.

AHA Ginkgosome Gel
Universal AHA product. Renews the skin, smoothes the appearance of fine lines and refines the pores. To be applied with preference as cure treatment.

Hyaluronic Acid Ampoules
Increases the intercellular moisture content to plump and smooth the skin. To be applied with preference as cure treatment.

Bio Cellular Ampoules
With thyme and aosa algae extracts to counteract the aging process and stimulate cell regeneration. To be applied with preference as cure treatment.
